

***Amendment to the Specification***

At page 6 of the Specification, please replace the paragraph at lines 29-31 with the following new paragraph:

Figure 2: Transactivation of reporter genes through GAL4CfEcR-DEF or GAL4NcEcR-CDE transfected into CHO cells along with VP16MmRXR $\alpha$ -EF and pFRLuc reporter by PonA or GS<sup>TM</sup>-E. ~~The numbers on top of the bars indicate fold increase over DMSO levels.~~
